

Invest in Your Vision: The Long-Term Value of LASIK

Tired of the never-ending cycle of contact lens expenses?

Imagine a life with clear, crisp vision without the hassle and cost of glasses or contacts. LASIK offers a unique opportunity to invest in your vision and experience long-term financial and lifestyle benefits.

The Hidden Costs of Contact Lenses

While contact lenses may seem affordable on a monthly basis, their costs add up significantly over time. Consider this:

Average Monthly Cost:
\$45–\$75

Yearly Cost:
\$540–\$900

Cost Over 15–20 Years:
\$8,100–\$18,000

That's more than the cost of LASIK!

LASIK: A One-Time Investment That Pays for Itself

LASIK is a one-time investment that can eliminate the recurring expenses of contact lenses, glasses, and solutions. With financing options as low as \$142/month, LASIK can be surprisingly affordable.

We understand that cost is a significant factor in your decision. That's why we offer:

- Flexible Financing: Choose from various financing options to fit your budget.
- Tax Benefits: Explore potential tax benefits through FSAs and HSAs.
- Transparent Pricing: We provide clear and detailed pricing information upfront.

Vision Correction vs. Other Monthly Expenditures

	Cell Phone	\$90/mo	5hrs/day
	Gas	\$120/mo	2hrs/day
	Car Payment	\$399/mo	2hrs/day
	Daily Latte	\$80/mo	30min/day
	LASIK	\$71/mo	all day/ every day
